

ZMC-802

AC SERVICE STATION

ZMC HI-TECH DUAL PRO AIR CONDITIONING STATION

ZM DUAL HI-TECH - ZERO CONTAMINATION & SIMULTANEOUS USE

Thanks to the innovative hydraulic circuit, the DUAL PRO charging station can manage two different gases without any contact between them. The ZMC-802 allows the operator to use the unit on two different gases at the same time.

- **Fully automatic station** for recovery, recycling and charging.
- **Graphic interface** will guide the operator towards the correct execution of the various processing phases.
- **Status LED Indicator** allows the technician to dedicate themselves to other tasks during the execution of the automatic procedure. Depending on the colour they will be able to understand the machine status.
- **Wi-Fi Connectivity**. The station is equipped with an ethernet module and a Wi-Fi module for remote control via smartphone or PC, it is also possible to save data on a PC.
- **Automatic control of internal leaks**: thanks to the advanced internal control system, the station will automatically alert the technician if internal leaks are detected.
- **Oil and tracer management** both with standard refillable containers.
- **Extra fan system**: the station is equipped with 4 high-efficiency fans that avoid any risk of gas stagnation inside.
- **Automatic Internal cylinder heater**.
- **Updatable database**.
